

Statement

To whom it may concern:

Bloomage Biotechnology Corp., Ltd. hereby certifies that:

Our product sodium hyaluronate is obtained through fermentation. The strain is a mutant of *Streptococcus equi subsp. zooepidemicus* deficient to produce hemolysin identified by IMCAS (Institute of Microbiology Chinese Academy of Sciences). The strain is non-GMO, not of recombinant origin and non-pathogenic. It is used as a major strain in the industrial production of sodium hyaluronate from fermentation, which is included in European Pharmacopoeia. Moreover, the culture medium contains no animal derived components.
